

Nour Sawan

AI Engineer | Applied ML & Generative AI

Address: Istanbul, Turkey | **Phone:** +905528866631/ +96170109035 | **Email:**

nsawan728@gmail.com | **GitHub:** <https://github.com/nour-sawan>

LinkedIn: <https://www.linkedin.com/in/nour-sawan-799086247>

Summary

AI Engineer specializing in Applied Machine Learning and Generative AI, with hands-on experience building AI applications. Google-certified in Machine Learning, Generative AI, and Cloud technologies. Delivered large-scale Azure and Google Cloud AI workshops to 300+ international participants. Passionate about developing practical, production-oriented AI solutions in collaborative environments..

Education

Master's Degree in Information Technology – 2026

Bahçeşehir University, Turkey

Bachelor's Degree in Computer Engineering – 2024

Bahçeşehir University, Turkey

Experiences

AI Trainer – 05/2025 – 05/2026

EARTech Information Technology, Istanbul, Turkey

- Delivered 3 Azure AI & AI Foundry workshops for international participants, training 300+ attendees (100+ per session) with hands-on experience in cloud fundamentals and applied AI workflows.
- Conducted Google Cloud-based AI workshops, guiding participants through data analysis, model building, and evaluation.
- Coordinated technical teams and sessions, ensuring smooth execution and on-time delivery of AI training programs.
- Built a real-time computer vision system for body measurements using MediaPipe Pose (33 landmarks), implementing camera-to-real-world scaling based on user height, developed as part of a collaborative team project.
- **Key Achievement:** Recognized on participants' certificates as an official trainer
- **Key Achievement:** Promoted by EARTch on the official page as an AI/Cloud workshop speaker

Frontend Developer – 06/2023 to 08/2023

Scramble Bit Company, Istanbul, Turkey

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React
- Utilized Git and GitHub for version control, ensuring smooth collaboration and project tracking
- Assisted in testing new features, ensuring functionality and usability before deployment.

Projects

- **AI-Based Weather Analysis & Activity Recommendation System**—Developed an agentic AI-powered weather analysis and recommendation system that combines real-time weather data, location, and user preferences to generate personalized activity suggestions.
- **Medical Document Q&A Chatbot**— Built a RAG-based chatbot over the Hand Hygiene in Healthcare Settings guideline using PDF chunking, FAISS, and embeddings to deliver evidence-based answers with reduced hallucinations

- **Movie Recommender System**— Developed an item-based collaborative filtering recommender (KNN + cosine similarity) with EDA, preprocessing, and a Streamlit UI for real-time recommendation
- **Chest X-Ray Pneumonia Detection** — Used transfer learning with DenseNet121 to classify pneumonia from chest X-ray images, aiming to improve diagnostic accuracy and generalization on limited medical imaging data.
- **Fashion-MNIST Classification** — Developed a neural network using TensorFlow and Keras to classify fashion items, focusing on model training, evaluation, and performance optimization.
- **Anomaly Detection in Credit Card Transactions** — Implemented unsupervised anomaly detection techniques to identify fraudulent credit card transactions in highly imbalanced datasets.
- **Sentiment Analysis Web App** — Built a Streamlit web app using a Hugging Face Transformers model (DistilBERT) to classify input text as positive or negative with confidence scoring.

Certificates

- **Generative AI Leader**, Google-02/2026
- **Professional Machine Learning**, Google- 03/2025
- **Professional Data Engineering**, Google- 11/2024
- **Cloud Digital Leader**, Google- 09/2024
- **Foundations of Project Management**, Coursera- 11/2024

Technical and Soft Skills

- **Machine Learning & Deep Learning:** TensorFlow, scikit-learn, Transfer Learning, Model Evaluation, Feature Engineering, hyperparameter tuning
- **Generative AI & LLMs:** LangChain, RAG, OpenAI API, Embeddings, FAISS.
- **Computer Vision:** OpenCV, MediaPipe
- **Deployment & APIs:** FastAPI, Streamlit
- **Programming Languages:** Python, Java, C++
- **Databases:** MongoDB, SQLite
- **Personal Skills:** Communication, Problem Solving, Leadership & Teamwork, Attention to Detail, Time Management, Presenting & Public Speaking, Reporting & Documentation

Languages

Arabic: Native | **English:** Proficient | **Turkish:** Intermediate
