Nour Sawan

AI Engineer | LLM Applications, RAG & AI Agents

Address: Abudahbi UAE | **Phone:** +971569381022**| Email:** nsawan728@gmail.com |

Portfolio: https://nour-sawan.github.io/

LinkedIn: https://www.linkedin.com/in/nour-sawan-799086247

Summary

AI Engineer specializing in Generative AI, LLM applications, RAG, and AI agents, with hands-on experience building AI-powered applications and machine learning solutions. Google-certified in Machine Learning and Generative AI, with experience delivering AI training to 300+ international participants. Passionate about developing practical, production-oriented AI solutions in collaborative environments.

Education

Master's Degree in Information Technology – 2026
Bahçeşehir University, Turkey

Bachelor's Degree in Computer Engineering – 2024
Bahçeşehir University, Turkey

Experience.

AI Engineer (Part-Time, Project-Based) | 08/2026 – Present
Rawyah | Saudi Arabia — Remote

- Designed and implemented the technical architecture for an AI-powered platform, from AI classification and decision logic to human review and backend integration.
- Built an AI text moderation system with five-category classification, confidence scoring, policy-based decision routing, and human-review workflows.
- Evaluated the AI classifier across Arabic, English, and mixed-language datasets, analyzing classification performance, consistency, confidence behavior, and latency

Freelance AI Developer and Consultant | Remote | 2026

- Built an n8n workflow to automate license expiration tracking and renewal email reminders.
- Designed an Agentic AI solution for a startup to automate project management workflows.
- Built and deployed a modern, responsive personal website, replacing an existing Blogger-based site.

AI Trainer – 05/2025 – 01/2026
EARTech Information Technology, Istanbul, Turkey

- Delivered Microsoft Azure AI Foundry training across two international program cohorts,leading hands-on AI labs and model experimentation.
- Provided technical mentorship and troubleshooting, ensuring participants successfully completed hands-on labs.
- Introduced participants to end-to-end machine learning development through a hands-on project.
- Collaborated on developing technical content, hands-on labs, and training materials for AI programs**.**

  Key Achievement:
  - Recognized as an Official Trainer on participants' certificates.
  - Represented EARTech as a Speaker for AI training programs

Frontend Developer – 06/2023 to 08/2023
Scramble Bit Company, Istanbul, Turkey

- Developed responsive web interfaces using HTML, CSS, JavaScript, and React
- Utilized Git and GitHub for version control, ensuring smooth collaboration and project tracking

- Assisted in testing new features, ensuring functionality and usability before deployment.

Projects

- **AI-Based Weather Analysis & Activity Recommendation System**—Developed an agentic AI-powered weather analysis and recommendation system that combines real-time weather data, location, and user preferences to generate personalized activity suggestions.
- **Medical Document Q&A Chatbot**— Built a RAG-based chatbot over the Hand Hygiene in Healthcare Settings guideline using PDF chunking, FAISS, and embeddings to deliver evidence-based answers with reduced hallucinations
- **Movie Recommender System**— Developed an item-based collaborative filtering recommender (KNN + cosine similarity) with EDA, preprocessing, and a Streamlit UI for real-time recommendation
- **Chest X-Ray Pneumonia Detection** — Used transfer learning with DenseNet121 to classify pneumonia from chest X-ray images, aiming to improve diagnostic accuracy and generalization on limited medical imaging data**.**
- **Fashion-MNIST Classification** — Developed **a** neural network using TensorFlow and Keras to classify fashion items, focusing on model training, evaluation, and performance optimization.

Certificates

- **Generative AI Leader**, Google-02/2026
- **Professional Machine Learning**, Google- 03/2025
- **Professional Data Engineering**, Google- 11/2024
- **Cloud Digital Leader**, Google- 09/2024
- **Foundations of Project Management**, Coursera- 11/2024

Technical and Soft Skills

- **Programming Languages:** Python, Java, C++
- **Generative AI & LLM Applications:** LLMs, RAG, AI Agents, LangChain, Prompt Engineering, Embeddings, FAISS
- **Machine Learning & Deep Learning:** TensorFlow, Keras, Scikit-learn, Transfer Learning, Model Evaluation, Feature Engineering, Hyperparameter Tuning
- **Backend & APIs:** FastAPI, Pydantic, SQLAlchemy
- **AI Automation :** n8n
- **Computer Vision:** OpenCV, MediaPipe
- **Deployment & Development:** Streamlit , Docker, Gradio , Git, GitHub
- **Databases:** MongoDB, SQLite, PostgreSQL
- **Database & Migration Tools:** Alembic
- **Personal Skills:** Problem Solving, Leadership & Teamwork, Attention to Detail, Presenting & Public Speaking, Reporting & Documentation,

Languages

Arabic: Native | **English:** Proficient | **Turkish:** Intermediate
